

Galvanized Landscape Trailers

Our single axle Landscaper trailers are the most popular trailer we sell. First, we build a tubing frame, then weld the side panels to form a solid 1 pc box. A tie down rail is welded on the top of both sides. With a deck height of less than 20", the standard 48" removable mesh ramp is ideal for loading anything on wheels. Our Tandem Landscaper Trailers are built for professionals who demand the best. A heavy duty frame, heavy duty axles and 10" or 12" electric brakes are standard. All of our trailers feature full frame designs, brand name components such as Fulton couplers, Carlisle tires, Dexter axle components, sealed premium lighting by Optronics and much more. As with all Excalibur Trailers, all electrical connections are soldered and sealed with heat shrink tubing to form a completely sealed electrical system resulting in unsurpassed lighting reliability. All Landscaper models feature a Hot Dipped Galvanized finish.
