

Galvanized Utility Box Trailers

Our Utility box trailers are built to give a lifetime of service. These models have a tubular welded steel frame with custom formed steel box sides welded together to form an incredibly durable 1 pc trailer that we guarantee will not rattle apart like bolted trailers. All of our trailers feature full frame designs, hot dipped galvanized finish, brand name components such as Fulton couplers, Carlisle tires, Dexter axle components, sealed premium lighting by Optronics and much more. As with all Excalibur Trailers, all electrical connections are soldered and sealed with heat shrink tubing to form a completely sealed electrical system resulting in unsurpassed lighting reliability. The tongues are braced for extra strength and the floor is 2 X 6 plank. With minimal care, these trailers will remain maintenance free, load after load, mile after mile & year after year.
